

# Arizona Wildlife Podcast Comprehension Activity

## Episode 20: Bald Eagle Management

**Part A:** *Determine whether each statement below is true or false. If it is false, correct the statement so that it will be true.*

1. Because of their protected status, bald eagles are managed by the Federal government.
2. There are over 300 bald eagles found in Arizona during the winter.
3. Most of the bald eagles that migrate to Arizona come from nearby western states.

**Part B:** *Below are different bald eagle management techniques. Describe what each one is and how it helps the bald eagle population in Arizona.*

1. Winter count.
2. Nest search.
3. Chemical and heavy metal monitoring.

**Part C:** *Answer each question below in complete sentences. The answers are not necessarily included in the content. They may require some critical thinking.*

1. Why does a larger population make the yearly productivity more stable?
2. Why do you think thinner eggs will result in lower productivity?
