Synopsis of Federal Regulations Applicable to Migratory Bird Hunting

Federal regulations regarding bird hunting are described in the Code of Federal Regulations (CFR). These can be found at www.access.gpo.gov/nara/cfr/. The regulations below can be found at 50 CFR 20.21 unless otherwise noted.

WEAPON - Migratory game birds may be taken only with a 10 gauge or smaller shotgun capable of holding not more than three shells. Birds may also be taken by falconry or by bow and arrow, or crossbow.

MOTOR-VEHICLE RESTRICTIONS - No person may take migratory game birds from any motor-driven vehicle, including aircraft. Special regulations govern handicapped hunters.

WATERCRAFT RESTRICTIONS - Waterfowl may be hunted from a watercraft (except a sinkbox) including those propelled by motor, sail and wind, or both when the motor has been completely shut off and/or the sails furled and its progress therefrom has ceased. The watercraft may be drifting as a result of current or wind action on the hull, beached or moored, resting at anchor, or may be propelled by paddle, oars or pole. A watercraft under power may be used to retrieve dead or crippled waterfowl but no shooting is permitted while the watercraft is underway. It is illegal to drive or rally game birds toward hunters by use of any motor-driven conveyance or sail boat.

DECOYS, CALLS AND BAITING - Migratory birds may not be taken with the aid of live decoys, recorded bird calls or electronically amplified bird calls. It is illegal to take birds over baited areas. An area is considered baited for 10 days after the bait has been removed, and a hunter need not know an area has been baited to be in violation.

RETRIEVAL AND TAGGING - All birds downed shall be retrieved if possible, and retained in the custody of the hunter in the field. Crippled birds must be killed immediately. Any birds given to or left with another person must be tagged by the hunter with a tag showing his name, address, the number and species of birds, and the dates they were killed. Packages in which migratory game birds are shipped must show the names of the sender and receiver, and the number and species of birds contained in the parcel. (50 CFR 20.25, 20.36)

BAG LIMIT - No person may, during any one day, take more than one daily bag limit or possess more than one daily bag limit in the field, or while returning to the car, hunting camp or home. One feathered wing must be left attached to all migratory game birds until they reach their final destination.

IMPORTATION - For information regarding the importation of migratory game birds killed in another country, hunters should consult federal regulations. One fully feathered wing must remain attached to all migratory game birds being transported between the port of entry and the hunter's home or to a migratory bird preservation facility. No person shall import any migratory game birds from any country

except Canada unless such birds are dressed (except as required above), drawn and the head and feet are removed. No person shall import migratory game birds belonging to another person. (50 CFR 20.61 through 20.66)

SEASON AND HOURS - No person may take migratory game birds during closed season. Migratory game birds may be taken only during hours open to hunting.

ATTENTION DOVE & PIGEON HUNTERS

\$3 Arizona Migratory Bird Stamp Required

Hunters age 16 and older of dove and band-tailed pigeon (as well as blue grouse, coots, snipe and common moorhens) must purchase a \$3 Arizona Migratory Bird Stamp for the 2005-2006 season. The stamp validates a hunting license for the federal Harvest Information Program. The Arizona Migratory Bird Stamp is available for purchase at any license dealer, Arizona Game and Fish Department office or online at azgfd.gov.

The Arizona Game and Fish Department prohibits discrimination on the basis of race, color, sex, national origin, age, disability in its programs and activities. Discrimination on the basis of sex is prohibited in federally assisted AGFD programs. If anyone believes that they have been discriminated against in any of the AGFD's programs or activities, including its employment practices, the individual may file a complaint alleging discrimination directly with the AGFD Deputy Director, 2221 W. Greenway Rd., Phoenix, AZ 85023, (602) 942-3000 or U.S. Fish and Wildlife Service, 4040 N. Fairfax Dr., Suite 130, Arlington, VA 22203. If you require this document in an alternative format, please contact the AGFD Deputy Director as listed above or by calling TTY at 1-800-367-8939.

One Feathered Wing

Sportsmen should note that one feathered wing (or head for sandhill crane only) must be left attached to all migratory game birds until they reach their final destination.

Littering While Hunting

All hunters are responsible for cleaning up after themselves. Shell casings (shotshell hulls) and associated debris constitute litter and must be picked up and packed out. All camp areas must be left clean.

Dove Bands

During the past two summers, Arizona banded 3,000 doves throughout the state as part of a nation-wide effort to better manage mourning doves. The hunter is a critical link in this mourning dove banding study. Banded doves have a numbered band and phone number. If you harvest a banded mourning dove please call 1(800) 327-BAND (2263) to report it or go online at www.pwrc.usgs.gov and select "Bird Banding Lab". Hunters can keep the bands and will be provided a certificate identifying the age, sex, date and location the bird was banded.

Legal Game Doves (May Be Hunted During Open Season)

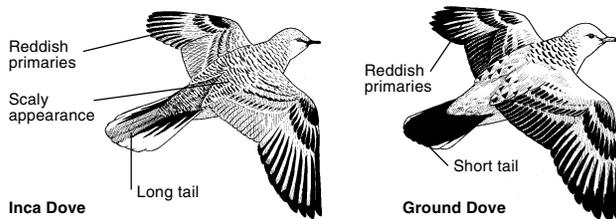

Mourning Dove

Slightly smaller than the white-winged dove. Mourning doves may fly with white-winged doves, but can be distinguished by their more rapid wing beat, more erratic flight path and pointed tail. In fall, the highest densities are found in desert agricultural areas, around water sources and desert areas where annuals are abundant.

White-winged Dove

Somewhat larger than a mourning dove with a white bar on the upper wing surface and a long, moderately rounded tail. Range of white-winged doves generally coincides with the distribution of the saguaro cactus.

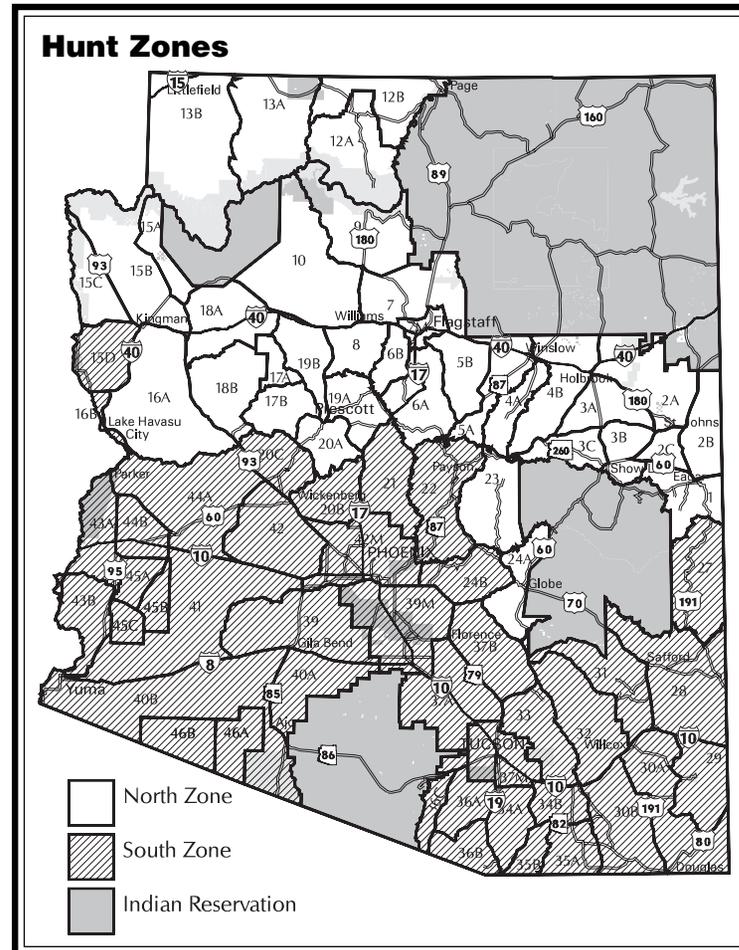

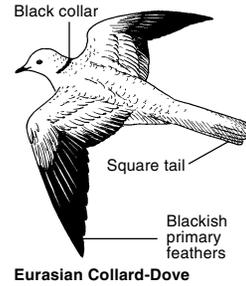

Protected Birds (May Not Be Hunted)

Inca Dove and Ground Dove: Small birds approximately half the size of a mourning dove. Both are gray and fly close to the ground with rapid wingbeats. The inca has a scaly appearance with a long tail that has white margins. Ground dove has a short, round dark tail. Common summer resident in the better watered valleys, mostly south of the Mogollon Rim.

Exotic Doves

Eurasian collared-doves are larger than both the native white-winged and mourning doves. They have a black collar on the top part of the neck, pale gray coloration, and dark primary feathers. These doves are an introduced species that have recently expanded their range into Arizona. Originally native on the Indian subcontinent, this bird was introduced to the Bahamas in the 1970s and quickly spread to Florida. Since then, they have moved westward into Arizona. The effect of Eurasian collared-doves on native dove species are unknown. Should you harvest Eurasian collared-doves while dove hunting, leave them unplucked during transport so they can be separated from mourning and white-winged doves. Eurasian collared-doves will not count as part of your aggregate bag of mourning or white-winged doves as long as they are identifiable.

Commission Order 19: Dove

This summary of hunting regulations is prepared for convenience only. It is not a legal document, as it does not contain all the laws and regulations relating to hunting. For additional information see the current Arizona Hunting Regulation booklet available at any license dealer or contact any Arizona Game and Fish Department office.
