Project Type: water tank repair

Brief Project Summary:
 The project will clean out and repair 16 existing dirt tanks and provide bentonite for two of the tanks. This is in an area that has good grass and browse production but water distribution is the limiting factor. This project will provide water to an area that has been severely neglected for the past several years.

Big Game Wildlife Species to Benefit (% benefit per species) 40% Mule Deer, 40% Whitetail, 20% Elk

Project has been coordinated with:

AZGFD, Tonto National Forest, Hardscrabble Allotment Permittee

NEED STATEMENT – PROBLEM ANALYSIS:

The American Gulch Allotment West of Payson is an area of good grass and forage for wildlife, but water is a limiting factor. The area has the carrying capacity for more elk and deer than it currently holds due to the lack of water. The American Gulch Allotment has been neglected for many years and is currently up for sale. Due to the fact that this will be a strictly contracted project there are very little matching funds. Partial funding would also be acceptable to try to get some water to the area.

PROJECT OBJECTIVES:

Improve water availability for elk and deer
Ensure water availability year round

PROJECT DESCRIPTION AND STRATEGIES:

Remove sediment from existing dirt tanks
Repair and damage to existing berms
Seal two tanks with bentonite.
